### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The claimed invention is drawn to a method of determining whether a compound is a mutagen by analyzing its effect on a mutagen sensitive gene when the cell is grown at stationary phase. The cited prior art of Justus uses logarithmically growing cells. As Applicant explained at the interview, there is no teaching of the efficacy of the method in stationary cells and there would be some expectation that the method would not work in such cells. Consequently, the current claims, which are limited to the use of stationary cells for the detection method, are novel and unobvious over the cited prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey Fredman whose telephone number is 703-308-6568. The examiner can normally be reached on 6:30-4:00.
